| | 2025 ¹ Historical | 2026 ² Prospective | |
| -Biomass | 0% | 0% | |
| -Geothermal | 0% | 0% | |
| -Eligible hydroelectric | 0% | 0% | |
| -Solar | 100% | 100% | Georgia |
| -Wind | 0% | 0% | |
| TOTAL | 100% | 100% | |

1. The 2025 figures reflect the resources that were supplied for the year ending December 31, 2025.
2. The 2026 figures are prospective and reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.
3. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e Energy.

For comparison, the 2025 average mix of resources supplying Cobb EMC includes: Coal (11.85%), Nuclear (14.00%), Oil (0%), Natural Gas (48.65%), Hydroelectric (12.23%), and Other (13.27%).

In 2024, the average home in the United States uses 865 kWh per month. [Source: U.S. EIA, 2025]
