DETERMINATION OF PEAKING SERVICE KWH/HOUR BILLED

The billing determinate for the Peaking Service Charge shall be based on the highest one-hour consumption of energy (kWh/hour) established by the member during Peak Notification Periods specified in advance by the Corporation. Peak Notification Periods will typically occur during the months of June through September on certain days when the Corporation forecasts that it will experience peak load conditions that may impact its wholesale power costs and distribution system capacity costs. Peak Notification Periods will exclude weekends and holidays.

The kWh/hour Billed shall be the member's highest one-hour kWh/hour consumption established within the Peak Notification Periods during the current and previous eleven billing months.

Until such time as the member has established a kWh/hour billing determinant during a Peak Notification Period, the kWh/hour Billed shall be the member's highest one-hour consumption of energy during the current billing month.

MINIMUM CHARGE

The minimum monthly charge under the above rate shall be the Service Charge plus the Peaking Service Charge plus the Power Cost Adjustment.

TERMS OF CONTRACT

All rates are a twelve (12) month commitment.

POWER COST ADJUSTMENT

The above rates shall be increased or decreased subject to the provisions of the Corporation's Power Cost Adjustment Schedule, PCA.

MONTHLY BILLING PERIOD

The kilowatt-hours billed hereunder shall be based on monthly meter readings at intervals of approximately thirty (30) days. The charges set forth in the Monthly Rate may be prorated to reflect a thirty-day billing period.
