

Downed and Dangerous

If you see a downed power line, always assume it is energized and dangerous. Avoid going near it or anything in contact with the power line.

Downed power lines can energize the ground up to a great distance – so make sure to stay as far away as possible.

Never drive over a downed line or through water that is touching the line.

If you see a downed line, notify the local authorities immediately.

Never try to move a downed power line, even if you think the line is deenergized or if you're using a non-conductive item – this will not prevent injury or death!
